Aloha.

What are the top 10 issues needing resolved to constantly grow productivity?

There is a line. Where productivity can never go over. ie 100 %.

Increasing productivity means more income and profit, right? eg constant increases in net profit %. This will logically never be 100 %. Approaching 80 %, my goodness, is even impossible, right?

I'm eager to grow EVERYTHING about Aotearoa.

Ngā mihi.

Jase Ashton.

**Subject:** Wellbeing

**Message:** The wellbeing budget. For God's sake, labour party, make it happen. I'm schizophrenic but haven't seen funding....towards me. For me. What the hell happened to the \$3bn promised,??? Drop in centre's like "The Apartment" in Dunedin w The PACT Group is ideal....soup kitchen there too. Chch needs one large one badly. And 4 satellites. I'm also gay and picked on, Māori and Hawaiian. A cocktail of hate by most people. Unwell atm unable to work. But I've worked all since 2001 diagnosis schizophrenia. We're not lazy. Teach mental health in primary schools. Stopping smacking kids have made them smarter, and quite well behaved, ironically.
