Email	s9(2)(a)

Page 3

Q2

Question 1: What supply chain disruptions and trends are you worried about? Drag issues you find most important to the top

Shipping and transport infrastructure bottlenecks	2
Climate change induced events such as floods, bushfires, and major storms	3
Dramatic price increases in crucial inputs	1
Total loss of access to crucial inputs or markets	5
Geopolitics events resulting in loss of access to some markets	4
Pandemic continuing to disrupt supply chains	7
Major players monopolising access to markets	6
Other (please specify)	8

Q3

Respondent skipped this question

Other (please specify).

Q4

Please explain why you ranked the options in the order above (optional)

To date price and supply chain have been and continue to be my biggest issues.

Q5

Respondent skipped this question

Anything else you would like to say on this question?
(optional)

Page 4

Q6

We have identified supply chain risks but we accept those risks: no action on changing or investing in alternative resilience activities at this stage

Question 2:What is your industry/community currently doing or planning to do to address supply chain concerns? Select all relevant answers

Q7

Any further details you would like to provide regarding the above (optional)

Given I am a small player I am at the mercy of these issues

Q8

Anything else you would like to say on this question?
(optional)

Page 5

Q9

There is no need for additional government intervention to enhance supply chain resilience.

Question 3a:How can the government help to enhance the resilience of your industry/community to supply chain disruptions? Select the option closest to your view

Q10

Respondent skipped this question

Any further details you would like to provide regarding the above (optional)

Q11

Question 3b: What government actions (here or overseas) are you aware of that have helped improve supply chain resilience?

None

Q12

Question 3c: Some government actions have downsides or require trade-offs. Can you give examples of occasions where government action to build resilience has come at a high cost or led to unintended consequences or trade-offs?

No

Q13

Respondent skipped this question

Anything else you would like to say on these questions?
(optional)
