

## **A FAIR CHANCE FOR ALL**

It is my pleasure to present my submission to the Productivity Commission regarding A Fair Chance for All.

- I am concerned that teachers and school principals are not employed there for the right reasons. Many do not have the school's and students' interest at heart.
- That people should not be employed in the education system before the age of 35 this is to allow them to get some life experiences before they start teaching. I am concerned that there many teachers do not have enough life experiences outside of education.
- I have experienced teachers and tutors who have a low opinion and looked down their nose at me, which is offensive and insulting. There must be safeguards and procedures to ensure teachers don't have low opinions of students and trainees.
- I am concerned that many tutors employed in adult workplace training programmes are not there for the right reasons, I have experienced bullying, belittling talk and tutors who have a low opinion of me and fellow trainees. I would like safeguards in place for trainees who are affected by this and unacceptable behaviour from tutors.
- When trainees and students are on workplace training, the company must make the experience meaningful, industry related and relevant, not dogs' body and cleaning out attics.
- Those employers have workers in meaningful and productive work, not doing handyman and dogs' body work
- Employers utilize employees, e.g., casual worker moves to part time work, part time worker moves to full time work.
- The government to abolish 90 Day Trials and replace with Blind Hiring as this is fairer for job applicants.
- Employers are not to listen to the opinions of applicants from other people.
- That the benefit must be the equivalent of the minimum wage to ensure people can live.
- Tougher penalties for landlords who do not act and behave professionally with tenants in all situations.
- Thank you for the opportunity to present my submission.

Yours Faithfully,

Gary Wills
