

The Japanese Government introduced the term Society 5.0, gaining widespread coverage at the CeBIT 2017 computer fair in Hannover, Germany, when Japan's Prime Minister Shinzo Abe outlines the Society 5.0 vision.

Society 5.0 is a super-smart society that leverages technology to achieve economic advancement and solve people's problems. This involves recognising that there is a limit to what people can do and that humans can live better lives by benefiting from the latest technological tools.

This is all about resolve social challenges by incorporating the innovations of the fourth industrial revolution (e.g. IoT, big data, artificial intelligence (AI), robot, and the sharing economy) into every industry and aspect of social

By doing this the society of the future will be one in which new values and services are created continuously, making people 's lives more comfortable and sustainable.

See more from a blog post I wrote on the topic including a short video from the Japanese Government <https://www.unboxedperformance.com/the-new-automated-vision-of-society-5-0/>

It would be nice if NZ could get on board and take some leadership in this area.

Thanks
